

SOLDIERS WILL RUN THE TRAINS

**Government Takes Action
When General Strike
Is Called**

CHILDREN ARE STARVING

**Gunboats and Soldiers Aid Police
in Maintaining Order Through-
out the United Kingdom.**

Liverpool, Aug. 17.—More than a thousand babies and double that number of young children are actually starving to death in Liverpool today, as a result of the shutting off of their milk supply. Their parents, unable to relieve their sufferings, are besieging city government offices, begging and praying for food, but nothing can be done to relieve the situation. No new signs of a settlement of the strike were apparent today. A warship is guarding the harbor and upward of 5000 troops are camped on the city streets.

London, Aug. 17.—Troops are being entrained from Aldershot, where they have been massed, as rapidly as possible today, and rushed to various strategic points, where they can be utilized in controlling the strike situation. Three thousand additional troops have reached this city, and more are enroute. There is talk here today of a renewal of the dock workers' strike in sympathy with the industrial movement at Liverpool and elsewhere.

London, Aug. 17.—Instead of putting into effect the threatened country-wide strike at 8 o'clock this morning, the executives of the four leading railway unions suspended their strike order and went into conference with President Buxton of the Board of Trade.

At a meeting of the executive committee of the Railway Employees' Federation held before this conference, it was determined that there should be no settlement unless the ship owners of Liverpool rescind their order locking out the dock workers.

Ramsay MacDonald, leader of the labor party in parliament, was present at the conference of union representatives with the Board of Trade officials. This is taken to indicate that the labor party is giving its support to the negotiations for a settlement.

London, Aug. 17.—At 6 o'clock tonight the officials of the Railroad Employees' Association telegraphed orders for an immediate strike to all local unions throughout the United Kingdom. At the last moment Premier Asquith warned the labor leaders that the government would not permit a complete paralysis of the railways. It is expected that 125,000 men will respond to the strike order. The government took immediate steps to prevent a complete tie-up and soldiers will be placed in charge of the trains. They hope to keep food supplies moving in this manner. Strike leaders assert that they will tie up every important road in the country and that the soldiers will be unable to move enough trains to keep London alone supplied with food.

FREE LIST BILL PASSES HOUSE

**Measure Will Go To President for
Veto or Approval After Senate
Looks It Over.**

Washington, Aug. 17.—The conference report of the farmers' free list bill passed the house today and the measure will be ready for the signature or veto of President Taft as soon as the senate accepts two minor amendments. The house practically agreed to the bill in the form in which it passed the senate, with drawing its amendment placing lemon on the free list. It insisted, however, on the elimination of corn from the two paragraphs in which reciprocal admissions of free grains and meats was made a condition precedent to the free listing of these products. Corn, it said, was a "joker" which would have prevented the operation of the paragraph. The senate will undoubtedly accept the bill as agreed to by the house.

EDWARD BOSTAND INJURED.
Biarritz, France, Aug. 17.—Edward Bostand, the dramatist and author of "Chantecler" was seriously injured in the head and abdomen in an automobile accident today. Apparently, however, his injuries are not fatal.

CONGRESS LEADERS ABANDON PLANS FOR ADJOURNMENT BEFORE 1ST OF SEPTEMBER

Washington, D. C., Aug. 17.—The most complicated situation that has yet developed in this congress was revealed today when leaders in both houses practically abandoned plans for adjournment before Sept. 1.

The senate indications were that the cotton tariff revision bill would be defeated and a substitute measure drafted by La Follette, comprising a complete revision of the metal schedule, would be passed by the alliance of the progressive Republicans and Democrats.

In the house it is predicted that Chairman Underwood, Democrat, of Alabama, would shortly introduce a revision of the metal schedule. At least a week of debate would ensue, it

is stated. Following this a conference committee from both houses will have to meet and agree on a compromise measure.

TARIFF FIGHT IN ON IN THE SENATE

Washington, Aug. 17.—In the senate this afternoon, immediately after consideration of the cotton tariff revision bill was begun, an amendment by Cummins (Republican) of Iowa, to add a revision of the steel schedule to the measure was adopted, 28 to 23. A moment later an amendment by Simons (Democrat) of North Carolina, to reduce the tariff duty on machines used in the manufacture of cotton was adopted 36 to 22.

the Maumee River, in the eastern section.

Intense interest marked his passage. When swooping low to read the names of the railroad stations, great crowds, including farmers who had come in by automobile from miles around, frantically yelled for him to come down. Some brought bouquets and lunches for the aviator, while policemen and municipal officials abandoned their posts to join in the ovation.

Before the aviator whizzed into view, his machine coming on like a rapidly growing spot in the western horizon, the telegraph offices were kept busy with inquiries as to his whereabouts. Whenever two minutes elapsed without word from him an impatient message went over the wires. "Can you give us any news of the big bird?"

Going toward Pettisville, Atwood noticed that his gasoline was giving out and he was compelled unexpectedly to land. While attempting to rise again with A. Leo Stevens of New York as a passenger, the wings of his machine brushed against the wing of a tree and both men were almost dashed out. Stevens was knocked against a fence, but escaped injury. It was necessary to abandon the passenger-carrying project. At Pettisville Atwood received instructions which resulted in a change in his original plan of going on to Sandusky last night. He decided to remain in Cleveland over tonight.

Atwood is now 745 miles from New York. With 520 miles already traveled, he will, on arriving in New York, have to his credit 1265 miles, as computed by railroad mileage, including 286 miles from St. Louis to Chicago, 540 miles from Chicago to Buffalo, N. Y., and 439 miles from Buffalo to New York. But Atwood asserts he will be entitled to consider a little more than this, as he has covered 50 or more miles in circling over St. Louis and Chicago and made detours enroute.

He said last night he would not definitely decide whether he would continue on to Boston until after his arrival in New York. He said he felt obliged only to fly to New York, as that would be sufficient to establish a new world's record, but he still was considering the feasibility of finishing up at Boston.

Discussing his experiences from his air craft in cross-country trips, Atwood said: "I am sure when aviation becomes common it will add a new point to life. Seen from my machine, houses appear to be clusters of toy houses and rivers appear as brooks. Over the towns the temperature is slightly warmer than over the country. It is curious that above the din of a city one may sometimes hear such distinct sounds as the barking of dogs."

DISCOVERED: TAKES ACID

Granite City, Ill., Aug. 17.—Mrs. Louis Weisenberger of this city Tuesday afternoon sent to her daughter Clara Weisenberger, aged 17, in Keokuk this telegram:

"If you don't give up Jack never darken my door again."
For answer an hour later she received the following message:
"Clara killed herself by drinking carbolic acid after getting your telegram."

Jack mentioned in the telegram was a boarder in the Weisenberger home. Mrs. Weisenberger had wanted her daughter to marry another boarder as soon as he got a divorce. The girl refused to agree to the plan.

ADMIRAL TOGO HAS INDIGESTION

Boston, Aug. 17.—Suffering from an attack of acute indigestion, Count Togo, vice admiral of the Japanese navy, cancelled his program for today. He will remain in his suite at the Touraine hotel all day and unless he is much improved, will cancel his program for Friday.

NARROW ESCAPES AT MEET

**Art Stone Drops Into Lake
at Chicago But Is
Rescued**

HEAVY WIND BLOWS

**Birdmen Protest But Judges Insist
on Flights Being Made—Fly-
ing Was Dangerous.**

Chicago, Aug. 17.—Arthur Stone, driver of a Queen monoplane, was snatched from death at the international aviation meet here yesterday after hopes for his life had been given up.

Howard Gill, in a Baby Wright, came almost as close to death, but escaped from under the wreck of his machine unhurt.

Lincoln Beachey after being driven far to the south, and fighting his way back above the field, glided 3000 feet in safety to earth, after his engine had stopped suddenly.

James Ward had an equally hard task to make his way back from far out over the lake, but descended safely in the field.

Stone's machine fell into the lake, just at dusk. He leaped from the falling plane and was rescued at the point of exhaustion by a motor boat, after he had supported himself in the water for more than half an hour. His machine was not recovered. That Stone was saved was attributed largely to the insistence of his wife that he guard himself with a life preserver.

In spite of the order that all flyers should wear life preservers, Stone with others, started for their machines unguarded. Mrs. Stone ran from the hangar just before the light and insisted that her husband wait while she tied an inflated automobile tire about his shoulders.

Unnerved by the deaths Tuesday of William H. Badger and St. Croix Johnstone and deterred by a high wind, many of the flyers here protested against going up and wanted the committee that the aeroplanes could not be controlled in the half gale in the upper air.

The judges were insistent, and finally half a dozen flyers rose for a cross water race from the shore and around the Carter H. Harrison crib, three and a half miles out.

Thomas Sopwith had completed his second lap of the race and had been declared winner, when a cry arose that Stone's machine had fallen into the water and that the aviator was drowned. Later it was reported that Stone was afloat and then a rumor circulated that a tug was bringing his body ashore.

None of these could be verified and Stone's fate was unknown until Commodore James Pugh's motor boat Disturber II reached the Chicago Yacht Club's landing with Stone alive and well.

Reports that Stone had been drowned were quickly flashed to the hangars. Almost the first to hear of his disappearance was his wife, Mrs. Irene Stone, who, with their baby, awaited Stone's return from the race far over the lake.

Then Robinson's hydroplane pilot of the Curtiss team came in and told that he had been unable to find any trace of the missing aviator. At this, Mrs. Stone began to weep. She turned over the child to a friend.

"Here, take the baby," she said. "I'm going out to the lake to help find Arthur."

As Mrs. Stone dashed out from a group of friends an automobile came in from the lake front and Mrs. Stone was assured that her husband had been picked up, alive and merely the victim of a ducking.

"I'm mighty glad I made Arthur put on that life preserver," exclaimed Mrs. Stone, her tears quickly drying. "I'm sure it saved his life."

Digs Way Out of the Ruins.
Howard Gill of the Wright team, provided the first feature of a man holiday when his machine suddenly crashed as it skimmed over the ground after a perfect landing and applied over with terrific force. Gill was pinned for an instant between tangled wires and taut canvas of the Baby Wright, but before startled spectators could reach him he dug himself from the ruins.

The first man to the wreck grasped Gill's hand.
"We thought you were killed," exclaimed the spectator.
"No, I'm not even hurt," replied Gill. "Look at the machine; it's a wreck."

Gill really had a narrow escape. He probably owes his life to the new feature of construction employed in the Baby Wright biplane. The engine instead of resting in the rear of the aviator's seat is fixed to one side.

LATEST PHOTO OF HENRY CLAY BEATTIE, JR., TO BE TRIED FOR WIFE MURDER AT CHESTERFIELD COURT HOUSE, VA., AUG. 21.

HENRY CLAY BEATTIE JR.

Richmond, Va., Aug. 17.—The trial of Henry Clay Beattie Jr., on the charge of murdering his pretty young wife by shooting her with a shotgun while in an automobile, will begin at Chesterfield Court House next Monday, Aug. 21. The defense will endeavor to prove that a third person,

identity unknown, shot Mrs. Beattie. Beulah Binford, former friend and associate of young Beattie, will be the most important witness unless Beattie himself takes the stand. The prosecution will attempt to show that Beattie killed his wife because of jealousy for Beulah Binford.

WILL ATTACK COMPENSATION ACT IN COURT

Columbus, Aug. 17.—It has become known here that the workingmen's compensation act is shortly to be attacked in the courts by manufacturing interests opposed to the reform. Joined with the manufacturers will be the liability insurance companies, who stand to lose hundreds of thousands of dollars of business in Ohio through the workings of the new law. The point of attack, it is learned, will be that section of the law that takes away from employers who refuse to contribute to the state compensation fund practically all the common law defense in case they are sued for damages for injuries to employees. This section of the law is intended to force all employers in the state into the scheme.

ANOTHER STRIKE OF MACHINISTS IS THREATENED

Cincinnati, Aug. 17.—"If A. C. Prendergast, superintendent of motive power of the B. & O. S. W. railroad, does not meet our demands today, I believe that approximately 3000 employees of the mechanical department of the road will vote to go on a strike at once," said Charles Herr, chairman of the committee of the machinists' union of the Washington (Ind.) B. & O. shops, today. Committees of the Washington, Chicago and Cincinnati machinists are holding a conference with Prendergast today to demand that E. A. Hunt, a union machinist, be reinstated at the Washington (Ind.) shops. The men claim that the road trumped up fictitious charges against Hunt and discharged him, while the real reason behind the action was Hunt's activities in the recent B. & O. strike.

THAW'S WIFE WANTS SHARE

Pittsburg, Pa., Aug. 17.—Asking for a livery commission for Harry Kendall Thaw, now confined in the Matteawan Hospital, New York, a petition was filed in the Common Pleas Court here today, in behalf of Evelyn Nesbit Thaw, his wife. Judge Davis admitted the petition. Attorney Frances Rawls of Philadelphia, states that Thaw's income is \$60,000 a year and Mrs. Thaw, living without means, is entitled to a share of this amount.

ROOSEVELT TAKES ALL THE BLAME

**Says He is Making No
Effort to Dodge the
Responsibility**

SAYS MOTIVE WAS CLEAN

**He Says He Permitted Absorption
of T. C. & I. Co. to Prevent
the 1907 Panic.**

New York, Aug. 17.—Emphasizing his desire to shoulder the entire responsibility for permitting the Steel Trust to gobble the Tennessee Coal & Iron Co. during the panic days of 1907, Col. Theodore Roosevelt, in a signed editorial in the Outlook today, declares he has no apologies to offer the public for what he did.

"No one need feel either concern or hope as to whether anything done by my administration will be 'discovered,'" he says, "for the excellent reason that there is nothing to be hidden. It was not my business, neither was it in my power to search the hidden domain of motive, and my action was conditioned, not upon what I believed to be the motives actuating the steel company, but upon my belief that they proposed taking would be enormously to the benefit of the community at large at that particular moment."

"Whether the chief motive of their action was to absorb the Tennessee Coal & Iron Co., or whether their chief motive was to have the threatened New York tin from failure (Moore & Schley, stock brokers), and thereby stop the panic, was of no concern to me. That both motives were in their minds I thought possible, and still think possible. What was the predominant motive was of no consequence. My concern was that the action should be taken and the situation saved in the interest of the people of the United States. Most people have short memories, but if anyone will look back and think the situation over carefully, he will understand it was not a question of saving any bank or trust company from failure; the question was of saving the plain people, the common people, of all parts of the United States from dreadful misery and suffering, and this is what my action did."

"One of the questions put to me indicated disbelief that the action taken was really efficient in stopping the panic. At the time and for some months thereafter, no man would have ventured to express such disbelief, unless prepared to be greeted with derision by every human being who knew anything whatever of the actual facts."

"The action taken was, in my judgment, the only action that would stop the panic, and it most certainly was of enormous, and, in all human probability, or decisive influence in actually stopping it."

"Certain other questions related to the enormous value of the coal and ore lands of the T. C. & I. Co. has no bearing on the purchase of four years ago. The purchase was made did not, by itself, affect the status of the Steel Corporation, so far as the Sherman law was concerned. I dealt in facts as they were, not facts as they might afterward become."

In connection with the editorial, the colonel also prints his prepared statement, which was carried in full in these dispatches at the time he was on the stand before the Stanley congressional committee.

"GRANDPA TEDDY" IS DELIGHTED

San Francisco, Aug. 17.—It is "Grandpa" Teddy today. A daughter was born to Mr. and Mrs. Theodore Roosevelt, Jr., early today. Following their marriage in June, 1910, the Roosevelts came to this city where Theodore, Jr., has been successfully engaged in the carpet business. It is stated at the Roosevelt home that mother and baby are doing nicely.

GEN. SHERWOOD MAY RETIRE

Washington, Aug. 17.—Representative Sherwood of Toledo, is seriously considering the advisability of retiring from Congress at the close of his present term and devoting his time largely to lecturing. The general has received a flattering offer from one of the largest lyceum bureaus in the country.

WHAT IS IT?

What large island?

Answer to Wednesday's puzzle—Crystal.

BILL ESSICK TIGHTENS WHEN NECESSARY AND PROVES A WONDER ON THE OFFENSE

Everybody Lambasts the Sphere—Essick Dashes Around For One Count and a Near Tally—Kihm and Pen-dry Are the Hitting Kids for the Locals—Core and Schmick Are Timely Hitters for the Visitors—Murray a Wonder—Next Home Game August 29th.

TOMORROW'S GAMES.
Newark at South Bend.
Grand Rapids at Terre Haute.
Wheeling at Dayton.
Zanesville at Port Wayne.

YESTERDAY'S RESULTS.
Grand Rapids, 7; Newark, 5.
Zanesville, 2; Wheeling, 1. (10 innings).
Wheeling, 11; Dayton, 10.
Terre Haute, 11; Dayton, 5.
Terre Haute, 8; South Bend, 3.

Bill Essick, on the mound for Grand Rapids, took a big hand in winning his own game yesterday. In nearly every inning, the locals traveled around far enough to get a good square look at the platter, but Bill was right there to throw on the brakes—till the ninth. In that frame his slants were dropped into choice spots all over the outfield, Gilbert, who batted for Riley in that inning, straightened one out with a loud report and it dwindled and dwindled for several seconds before it sunk below the level of vision. Three runs counted. Then in the same inning, Craven doubled and Pendry singled, loading the corners. Essick promptly screwed the lid down tightly and Wickland swung hopelessly wide. This choice twirler also made two noble efforts to score on two-base hits from the keystone sack and in one case was successful.

As for Kihm, his efforts were no easier to guess, but his support wobbled badly at times, and some of the louder cracks off his delivery were heard in breathless spots sacred to the local fans when men are crowding the bases. Every player on the visiting team secured at least one hit, excepting Barkwell, and rate is very kind to Barkwell. That gentleman is a wonder at drawing passes. Pendry and Kihm started in the stickwork for the locals. Core and Kroy, for the visitors, hit hardest where it hurt most, and Schmick was the handy lad, getting a single, double, and laying down two neat sacrifices. In the field work, the visitors froze to all the doubtful ones—no one starting, no one erring. For Newark, Murray was a whole team in himself, getting four assists and seven put-outs.

The Grads took the lead in the fifth. Fortune smiled on the visiting team and Manager Smith smiled on the quiet. He had determined on one game out of the series and Bill Essick was the man to do the dirty work. And Manager Pendry wanted a whole series to boast about, for whole series are not so common in these parts, and Jack scratched the ground with his paw and egged the locals on toward victory.

Consequently, everybody pounded the sphere regularly, everybody sunk his hooks into it accurately, and when the smoke cleared away Newark had the emaciated end of a 7-5 score. But the fans were not the least bit discouraged over the score. Oh, no! The home team had a big rally in the ninth and every spectator was on his feet, cheering.

The team left last night for South Bend. The next series scheduled for Wehrle Park will begin Aug. 29, when the team meets Ft. Wayne. Promptly at 7:15 the morning began. Kroy, the first man up, hit the pellet on the end of the nose for a single. Schmick handed out a sacrifice. Murray covered first and on Sandy's effort to double, Kroy went to first. Barkwell drew his fifth pass of the series. Core singled, scoring Kroy, and Barkwell moved up the line. Both advanced on Riley's wild pitch. Koehler grounded to Pendry, who threw Barkwell out at the plate. Kelley was an easy out. Pendry to Kihm.

In the fifth the visitors annexed two more. Holmes singled to right center. Essick went to first on fielder's choice to retire Holmes. Kroy popped to Murray. Schmick tore off a two-sacker, scoring Essick. Barkwell had the nerve to wait for another pass. Core singled, scoring the

Brooklyn	39	65	.375
Boston	25	81	.238

With Ty Cobb out of the game, O'Leary is striving for batting honors, adding three nice singles to his collection yesterday.

Steele pitched wonderful ball for the Pirates, putting out the first 25 infants without permitting one to reach first base. Erwin, the 26th, got a single, and was the only infant to get to first.

This is a bad year for baseball stars. Lajoie was out of the game nearly all season. Ty Cobb is sick and Hans Wagner is out with an injured ankle, which may keep him in bed for a week or more.

"Bresnahan is surely 'getting his'n' this year. Hans Lobert spiked him in the wrist and the Cardinal manager will probably be out for a week. Magee was in the game, but uttered no kick.

Well, well, well. Who would have ever thought that Miller Huggins could make enough noise to be banished from the game? Will wonders never cease?

This C. Mathewson is not the best pitcher in the world, but he surely has the Indian sign on the Reds. It was his 22d consecutive victory over them.

Schutte is trying to break all home run records, his 18th of the season being annexed in the game against Boston. In addition, he got a nice double.

For an "indifferent player," Timmer seems to be doing fairly well. Three hits, two runs, one put-out and six assists look like a pretty fair day's work.

CAN USE EVANSVILLE PARK.
Evansville, Ind., Aug. 17.—Arthur Gross, owner of the baseball park here, yesterday sent a telegram to President Gossnell, president of the Kitty Baseball league at Vincennes, Ind., saying the local park could be used to play off transferred Kitty league games, but that it must be understood that the Kitty League has no hold on this territory, and that no franchise can be obtained here. Local fans still hope to get into either the Southern league or some other league of equal importance.

TWO SUSPECTS ARE CORRALLED BY CAPT. SWANK

ALLEGED THEY WERE TRYING TO SWINDLE PEOPLE IN DIAMOND SALE.

One Genuine Stone and Eight Fakes Found When the Men Were Searched By Police.

The prompt action of Capt. Chas. Swank of the Newark police department resulted in the arrest of H. E. May, alias H. Smith, and G. B. Brown, both of Elmira, N. Y. In the arrest of the two men the police claim to have nipped in the bud a clever swindling game in which the swindlers hoped to victimize Newark people.

The game was simple and yet clever. According to the claim made by the police it was simply a case of selling a big diamond to the victim and transferring the stone before it was handed over to the purchaser.

The two men drew the attention of Captain Swank on the street yesterday and he shadowed the men for an hour or so, finally learning that they were registered at Hotel Seiler.

Last night the captain learned that the men left a call for 7 o'clock this morning. He placed an officer in charge of the force, shortly after midnight and went home to get some sleep to wind up the case this morning.

While near the hotel about eight o'clock, the men emerged and later they were seen to approach their victim on the street. He was escorted to the room of H. Smith at the hotel.

Capt. Swank notified police headquarters, where Patrolman Burke and Swinchart were waiting for the call. These men, with Chief of Police Hindel, went to the hotel and, with Captain Swank, went to H. Smith's room.

At the door the three men, Smith and his partner and their victim, were met coming out. The trio were taken back into the room and the two suspects searched.

In the "cuff" of Smith's trousers, Capt. Swank found a big 2-carat diamond and Patrolman Burke detected Smith's partner, Brown, concealing a sapphire of the same size under the edge of a table cover. Seven more stones of the same size, all sapphires, were found wrapped in cotton and concealed between the shirts of Brown. The victim satisfied the police that he was innocent of wrongdoing and was allowed to depart.

May, alias Smith, and his partner, Brown, were taken to the city prison and locked up. They were slated "held for investigation."

Chief of Police Hindel notified the Columbus police department of the arrest of the two men and one of the best detectives in that department will be sent to the city to identify the men, if possible.

Detroit, Mich. Western Canadian citizens are overwhelmingly in favor of municipal ownership, according to corporation counsel Italy just returned.

recently declared before a liquor dealers' convention it was perfectly proper for a young woman to drink highballs in public.

New York.—When Jacob Weinberg lost his way in Brooklyn last week, Fannie Goldberg, 56, guided him home. Another case of love at first sight and now they're going to be married.

Cincinnati.—Yesterday was the 75th birthday anniversary of J. J. Mayberry, Covington, Ky., business man. His wife's present was a petition for divorce, alleging cruelty. They have been married 45 years.

Burlington, Ky.—Jas. David, 21, cast down because his sweetheart, Miss Isabel Snyder had not given him all of her attention, went to her home at Florence, Ky., drank poison and fell dead at her side.

Cincinnati.—The "king of hobos" traveling incognito in a lecture to newshybs here, says Cincinnati is the mecca of knights of the road, because it's "so hospitable." "The king" says he was once a professor at Notre Dame university.

New York.—Wm. Shaw, 385 pounds, was broke, far from home. He climbed an "L" pillar, stuck his head between the ties as a train approached and was arrested for attempted train wrecking.

New York.—When D. L. Guthrie of Cleveland retired at the Waldorf, he found his bed occupied by white-faced monkey. The Simian had refused to sleep in the basement because he was lonesome.

Chicago.—Jas. Van Nest believes a man can eat his pie and still collect \$20,000 damages if there was zinc in the pie. He has filed suit for that amount against Edward Walters, a grocer.

TODAY'S MARKETS.
CHICAGO.
Chicago, Aug. 17.—Today's Hogs—Receipts 14,000; market steady; mixed, \$7.00 to \$7.90; light, \$7.20 to \$7.90; good, \$7.10 to \$7.90; pigs, \$6.10 to \$7.70.

Cattle—Receipts 4,000; market strong; prime beefs, \$5.25 to \$8.10; stockers and feeders, \$3.15 to \$5.60; cows and heifers, \$2.25 to \$6.25; calves, \$6.00 to \$8.50.

Sheep and Lambs—Receipts 16,000; market slow; native sheep, \$2.40 to \$3.50; native lambs, \$4.25 to \$7.10.

PITTSBURGH.
Pittsburg, Aug. 17.—Today's Cattle—Supply light; market steady.

Sheep and Lambs—Receipts fair; market slow, 25c lower.

Hogs—Receipts 19 double decks; the market is active; medium, \$8.20 to \$8.25; heavy, \$7.90 to \$7.95; Yorkers, \$8.20 to \$8.25; pigs, \$7.50 to \$8.10.

RAGAN TELLS OF INJURY IN LETTER

Shortstop Steve Ragan has written the fire ladders of the Central house a letter thanking them for their expression of sympathy expressed in an epistle from the men as a whole. In the letter Ragan gives the first authoritative information as to his real condition, that has been received in Newark.

It will be seen that he is very optimistic over the outcome of the accident and says he thinks he will be back here next season. The letter follows:

Kansas City, Mo., Aug. 1911.
Members Central Fire Dept., Newark, O.
Gentlemen:—Your very kind letter of sympathy received while I was confined to St. Joseph's Hospital in Port Wayne, Ind., and I wish to thank the members of the department for the interest they have shown in my behalf. It surely was a pleasure for me to receive such a friendly and jolly letter when everything and everybody seemed so blue, and it called to mind some memories of the boys here at home which were altogether pleasant.

Station No. 17, here in Kansas City is just across the street from my home, and I am a personal friend of everybody, from watchman to chief, and last winter had some great domino and checker games every Saturday evening, and yesterday Chief George Hughes and myself successfully walloped any two that the wagon, truck or steamer crews could muster for the domino "champion" ship.

The leg is firmly put up in cast and is doing nicely. The broken bones are set straight and since the joint was not damaged by the break, I do not fear permanent injury. In fact, I expect to be on the job next spring in good "come back" style, and if Newark retains the club, and my services, I hope to amply repay the interest shown me this fall by some capable shortstop play next year.

Again allow me to thank the boys for their courtesy toward me and let me remain, Respectfully yours,
DR. STEVE RAGAN.

Aug. 13, 1911. 3034 Holmes St.

ASTRONOMICAL EVENTS.
(From noon today to noon tomorrow.)
Sun sets 6:51; rises 5:09; moon rises
10:47 p. m.; planet Mercury still vis-
ible, setting shortly after the sun.

HEALTH HINT FOR TODAY.

Powdering the Face.
The most important thing to
remember in the use of powder
is its removal from the face be-
fore retiring. By allowing it to
remain on the skin the pores be-
come clogged and refuse to per-
form their natural duties, and the
result is a discolored and blot-
chy skin that no amount of
powder or cosmetics will entire-
ly efface.

DEMOCRATIC CLUB TO MEET FRIDAY NIGHT

There will be a special
meeting of the Licking Democ-
ratic Club Friday evening
at 7:30 o'clock. All Demo-
crats of the city, who are in-
terested in the Democratic
party and want to see it suc-
ceed, are urged to be present
at this meeting.

REGISTRATION DAYS

Two registration days will occur
before the primaries—Wednesday,
August 30, and Friday, September 1.
All new voters and those having
changed residences since last voting
will be required to register or get a
transfer.

THERE WILL BE INCREASED BALANCE IN STATE TREASURY

Announcement by the State Tax
Commission recently that the revenue
from the Willis capital stock tax will
be \$1,000,000 more this year than last,
means that the treasury balance will
be much larger at the close of the Har-
mon administration than was expected.
When estimates of the state's revenues
were made near the close of the 1911
legislative session, this \$1,000,000 an-
nual increase was not included. In
the two years that the present admin-
istration has to continue, the treasury
will be replenished from this source
to the extent of \$2,000,000. The re-
venue under the Cole law, when an-
nounced, also is expected to show a big
increase.

Thus by Democratic efficiency the
balance in the state treasury is being
increased. State Auditor Fullington,
the only relic of the discredited and
infamous Republican state machine in

the state house, at the close of the leg-
islative session predicted there would
be a deficit in the treasury in two
years. He also asserted the one per
cent tax law would not yield sufficient
money to operate the public schools on
the present basis.

In fact auditor Fullington talked
like an enemy to the state. Nothing
would have suited him better than a
treasury deficit and a shortage in
school funds. But, happily, as a result
of the good business administration
of Democrats there will be neither.
The grand tax duplicate of the state
will be much larger than the estimate
Fullington made, so that the state
levy for common schools this year will
provide as much money if not more.

REPUBLICAN NATIONAL EXTRAVAGANCE

Since 1860 the population of the
United States has increased 186 per
cent., while expenses of the national
government have increased 550 per
cent. During nearly all of this time
Republicans were in control.

Under the Democratic administration
the appropriations for the two years
during the fifty-third congress amount-
ed to \$917,013,523.34; a Republican ad-
ministration during the sixtieth con-
gress appropriated \$2,052,799,400.68 for
1909 and 1910, an increase of \$1,135,-
785,877.34.

Since 1896 the war department ap-
propriation has grown 335 per cent.,
and the navy appropriation 365 per
cent.

Large additions to the salaries of
the public officials, from the president
down, expensive new bureaus, commis-
sions, pledged to economy, has already
put 26,944 tax-eaters on the public pay
roll at an annual total cost for salaries
of \$21,942,275.10. The White
House expenses this year are \$135,358
more than they were under Cleveland
in 1894 and three vessels are detailed
from the navy to serve as yachts for
the president, while eight government
automobiles are at his disposal.

Republican extravagance is piling
the burden of taxation higher and higher.
The great part of this burden falls on
the farmer, the workman, the small
home owner. The only salvation is
the return to Jeffersonian simplicity
and retrenchment of expenses by a
Democratic congress, which alone can
and will lighten the burden.

Arizona need not be discouraged.
Oklahoma had to drop an anti-negro
suffrage provision from its Constitu-
tion before it could get into the Union,
but no sooner was it inside than it
adopted as an amendment to the Con-
stitution the provision it had been
obliged to drop. It may be in violation
of the United States Constitution, but
the Courts have not yet determined
that, and the President and Congress
could not keep Oklahoma from having
such a Constitution as it liked. Ari-
zona can come in without the recall
and then adopt the recall as an amend-
ment afterward.

BUTTER KRUST

YOU NEED THAT VACATION.

A. D. & C. Coast Line Trip to Mack-
inac is Most Delightful Now.

You see it's like this—you've ham-
mered away at your work all season
and now you feel the need of that
vacation which you've been denying
yourself. The D. & C. line offers the
best transportation facilities to
Mackinac and the North Country,
where every inch of scenery is inter-
esting and where every little lake
contains the fish that you want.

Send for the D. & C. pamphlet
and take the next steamer.

sonable. Good references as to abil-
ity. 458 W. Sixth Ave., Columbus, O.

CONGRESSMAN WHO WILL HEAD INDUSTRIAL PROBE

It has become known in Washing-
ton that Marvin W. Littleton, con-
gressman from Nassau county, N.
Y., will be chairman of the proposed
congressional committee which will
be authorized to investigate the in-
dustrial conditions of the United
States. This committee will, it is

reported, be the most important one
appointed by congress in recent
years. "I am advised," states Mr.
Littleton, "that there is to be a thor-
ough inquiry into all the commercial
ills of the nation and that a confer-
ence will be called to determine the
problem of how to deal with the in-
dustrial situation in America. It is
a project that will involve a most
drastic investigation and bring to-
gether capital and labor in an effort
without bias to find out just what
should be done."

"That is the best news I have
heard," says George W. Perkins, for-
mer partner of John Pierpont Mor-
gan, who recently testified at length
before the Stanley committee, which
is probing the methods and opera-
tions of the United States Steel Cor-
poration.

\$100 REWARD, \$100.
The reader of this paper will be
pleased to learn that there is at least
one dreaded disease that science has
been able to cure in all its stages, and
that is Catarrh of the Bladder. It is
the only positive cure now known to
the medical fraternity. Catarrh be-
ing a constitutional disease, requires a
constitutional treatment. Hall's Catarrh
Cure is taken internally, acting di-
rectly upon the blood and mucous
surfaces of the system, thereby de-
stroying the foundation of the disease
and giving the patient strength by
building up the constitution and assist-
ing nature in doing its work. The pro-
prietor has so much faith in its cur-
ative powers that they offer One Hun-
dred Dollars for any case that it fails
to cure. Send for list of testimonials.
Address: R. J. CHENEY & CO., Toledo,
O.

Sold by all Druggists, 75c.
Take Hall's Family Pills for consti-
pation.

born in a village in Italy, one died from
diseases that physicians say are almost
invariably caused by impure milk.

THE RECALL.

And now the tinker statesman in forum and in hall, are telling us
our safety depends on the recall. If any man in office to monkey
should begin, we simply rise and dump him, and put another in. And
we, the sovereign people, in whom all virtue lies, shall hold the seat
of judgment, deciding what is wise. Should any man displease us, or
steal our bile or gall, we'll take his trail and scalp him—our weapon
the recall. If one is independent and shies at our advice, we'll go up
on the warpath, and put him on the ice. Just men went to Lincoln,
to threaten, plead and rant; and this their ambition, to get the goat
of Grant. "He drinks!" one pilgrim shouted, "and so his head should
fall." "He smokes!" another thundered, intent on the recall. Said
Lincoln, sad and somber: "I've heard that bit of news; I wish the other
soldiers would drink Grant's kind of booze." Herein there lies a
moral of use to one and all when noisy tinker statesmen insist on the recall.

PROGRAM FOR LABOR DAY CELEBRATION IS PUBLISHED

Labor Commissioner C. H. Wirmel of Columbus Has Ac-
cepted Invitation to Come to Newark—Grand Mar-
shal and Aids Are Named—The Line of March
and Formation of the Big Parade.

The committee in charge of the La-
bor Day celebration in Newark has
received word from Labor Commis-
sioner C. H. Wirmel of Columbus, ac-
cepting the committee's invitation to
join with the Newark Trades and La-
bor Assembly in the big celebration
here September 4. Mr. Wirmel stated
his acceptance that he had received
several other invitations but that he
had joined these places on past oc-
casions and decided that he owed it to
Newark to come here.

Mr. Wirmel will be honored with a
prominent place in the head of the
mammoth parade with the city officials.

The program for the big celebra-
tion has just been completed and is
herewith published for the first time.
It will be noticed that all features
have been planned with a view of
keeping the crowds in the city.

Heretofore portions of the celebra-
tion have been featured at the parks
but it takes the people away from
town and the committee decided to
have all the celebration in the city.

The committee which has charge of
the arrangements is entitled to much
credit for the excellent celebration
which they have planned for the en-
tertainment of Newark's union men.

The program:
The following committees have
worked hard in order to make this
Labor Day celebration the largest one
Newark has ever seen before:

A. J. Bingham, chairman; Charles
Roesser, secretary; Frank Caine, treas-
urer.

Soliciting Committee.
J. C. Adams, Charles Butler, James
McCarthy.

Privilege Committee.
Frank Caine, Charles Roesser.

Amusement Committee.
Joseph Nold, chairman; W. A.
Archer, secretary; Louis Carter, Fred
Lingweller, Wm. Donahue, J. R.
Beckett, Burner Bliss, C. H. Rose-
brough.

Music Committee.
Wm. M. Morgan, Fred C. Stevens.
Dance Committee.
Gail Smart, J. B. Lentz, Jacob Voll-
mer.

Grand Marshal.
A. J. Bingham, Bottle Blowers'
Union.

Aids.
First Aide—Edward Southard, Car-
penters and Joiners.
Second Aide—Jacob Vollmer, Typo-
graphical Union.

Third Aide—Lewis Carter, Team-
sters' Union.

Line of March.
Form on East Church street;
march west to Sixth street, down
Sixth to Main, east on Main street to
the square, and around the south side
of the public square to East Main
street to railroad company tracks,
counter march to square around the
north side of public square to Hud-
son avenue, up Hudson avenue to
Church street west on Church street
to Fourth street and disband.

Formation of Parade.
Labor Commissioner State of Ohio,
Charles Wirmel.

Mayor John M. Ankele.
Police Department.
Fire Department.
City officials.

Amusement Program.
The program in the way of amuse-
ments has been carefully arranged by
the amusement committee and is as
follows:

1:00 p. m.—West side of public
square—Freddie Cunningham, high
wire artist performance.

1:30 p. m.—Court House park—
Drill given by old guards of Colum-
bus and Newark.

2:00 p. m.—Court House Park—
Drill by the Modern Woodmen of
America Drill Team.

A. L. U. hall Dance until 5:30.

2:30 p. m.—South Side Public
square Climbing of Greased Pole.
Prize \$5.00.

3:00 p. m.—Court House Park—
Drill by the Uniformed Rank Knights
of St. John.

3:30 p. m.—South Side Public
Square—Running race by the young

ladies. Prize is a handsome rug do-
nated by the Brilliant Furniture and
Clothing Company.

3:45 p. m.—Wheelbarrow race
around the public square by young
men. Prize donated by H. H. Johnson
& Son, West Newark Grocers.

4:00 p. m.—Sack race by four men
—Prize donated by Fred Umstot, W.
Newark's grocery.

4:15 p. m.—East side of Public
Square—Potato race by six married
ladies. Prize donated by Ferd Mohl-
enaph, China Store.

4:30 p. m.—In front of the Warden
Hotel—Watermelon contest by the
colored folks. Prize donated by the
King Shoe Company.

4:45 p. m.—West Side of Public
Square—Tug of war by the young
men. Prize of \$5.00 donated by the
Labor Day committee.

5:00 p. m.—North side of public
square—Old Men Fiddler's contest.
Prize donated by the Newark Artifi-
cial Stone & Plaster Company.

5:30 p. m.—Conclusion of the per-
formance of Freddie Cunningham,
the high wire artist.

8:00 p. m.—A. I. U. Hall—Dance
until 12:00 a. m.

The Newark Trades and Labor As-
sembly takes this opportunity to
thank one and all that have assisted
to make this day one of the great
days for organized labor.

Accused of Stealing.
E. E. Chamberlain, of Clinton,
Me., boldly accused Bucklen's Arnica
Salve of stealing—the sting from
burns or scalds—the pain from sores
of all kinds—the distress from boils
or piles. "It robs cuts, corns, brui-
ses, sprains and injuries of their ter-
sor," he says. "As a healing remedy
its equal doesn't exist." Only 25c at
F. D. Hall's.

Greensburg, Ind.—Mrs. C. L. Creath
and her mother, Mrs. Sarah Scott of
Pekin, Ills., have been re-united after
believing each other dead for thirty
years.

NEWARK'S NEW WARDS

AND PRECINCT LINES

Board of Elections Will Transfer Voters' Names to

New Precincts—Those Voters Must Register

Who Have Moved or Become of Age

Since Last Election.

The Board of Deputy State Super-
visors of Election at a recent meeting
decided to rearrange the voting pre-
cincts in the city to conform with the
wards, of which there are now six in-
stead of four as formerly. In the re-
arrangement there are 28 precincts in-
stead of 26 in the city of Newark. They
are as follows:

FIRST WARD.
No change in precincts.

SECOND WARD.
Precinct A—No change.
Precinct B—No change.

THIRD WARD.
Precinct C—Formerly Precinct E, of
the old second ward.

FOURTH WARD.
Precinct D—Formerly Precinct E, of
the old second ward.

FIFTH WARD.
Precinct A—Formerly Precinct A of
the old fourth ward.

SIXTH WARD.
Precinct B—Formerly Precinct B of
the old fourth ward.

SEVENTH WARD.
Precinct C—Formerly Precinct G of
the old fourth ward.

EIGHTH WARD.
Precinct D—Commencing at the in-
tersection of Granville street and the
west corporation line. Bounded on the
north by Granville street to an alley
opposite Buckingham street, on the east
by an alley and Wilkins street to Co-
lumbia street and an alley from Colum-
bia street to Locust street at Eighth
street, on the south by Locust street to
Tenth street, along Tenth street to Co-
lumbia street, along Columbia street to
the west fork of the Raccoon Creek,
on the west by the creek and the me-
anderings thereof to the west corpora-
tion line and west corporation line to
the place of beginning.

NINTH WARD.
Precinct E—Commencing at the in-
tersection of Eighth and Locust streets.
Bounded on the east by Eighth street
to Church street, on the south by Church
street to the west fork of the Raccoon
creek, on the west by the creek to a
line opposite Columbia street, on the
north by Columbia street to Tenth
street, on Tenth street to Locust, on
Locust street to the place of beginning.

TENTH WARD.
Precinct F—Commencing at the in-
tersection of Locust and Fourth streets.
Bounded on the west by North Fourth
street to Church street, on the south by
Church street to Eighth street, on the
west by Eighth street to Locust street
and an alley to Columbia street and
Wilkins street and an alley to Granville
street, opposite Buckingham street, on
the north by Granville street to Lo-
cust street and Locust street to the
place of beginning.

ELEVENTH WARD.
Precinct G—Formerly Precinct C, of
the old second ward.

TWELFTH WARD.
Precinct D—Formerly Precinct D of
the old second ward.

THIRTEENTH WARD.
Precinct A—Commencing at the in-
tersection of the Ohio Canal and the
West Fork of the Raccoon Creek
Bounded on the east by the west fork
of the Raccoon Creek, on the south by
the south fork of the Raccoon Creek

THE SCIENCE OF FARMING

RAISING DRAFT HORSES

THE raising of draft horses is probably as profitable an industry as any other line of business on the farm. There seems to always be a demand in the market for good horses. If a person will start in the proper way, breed his mares to choice stallions and keep the colts off the wire fence, money invested in the enterprise will be well spent.

People who make a dual-purpose horse out of the draft horse make a mistake. We all know it requires weight to do heavy work. A 200-pound man can lift or drag on the ground much more than the 150-pound man. The draft horse weighing 1,500 pounds, if properly put together can do more work in the field than the 1,200-pound draft horse can. The demand on the market is for two distinct types of horses, namely, the draft horse and the light horse.

A large percentage of the farm work done in this state is done with the medium draft horse, or as some people term it, the dual-purpose horse. This horse usually weighs from 1,000 to 1,300 pounds in working condition. You quite frequently find four of five of this type hitched to a gang plow where three or four horses of the proper weight would do the work easier and the expense of keeping would be much less. Not

only the expense of keeping, but the trouble of caring for four or five horses is much greater than caring for three or four. We quite frequently find individuals of the draft breeds that show considerable speed.

As a matter of fact, they were not made for drivers. When in Scotland two years ago I saw geldings weighing 1,800 to 2,000 pounds working on the streets. The drivers never put them off of a walk. They walk faster than the common average draft horses in this country, because they are taught to walk when young. One common mistake made by people when selecting a stallion to breed to is that they do not pay sufficient attention to the legs and feet.

The draft horse must weigh 1,500 pounds. A marking of four is given to this point. Students are taught to tell the age of the horse by his teeth. They are taught how old a horse of the draft type should be before he should weigh 1,500 pounds. His form must be broad, massive and proportioned. Four points is a perfect marking. A long-legged horse cannot work beside a short-legged horse of the same weight during the season. A horse that is weak in the front quarters and heavy in the hind quarters is not properly proportioned. The next is quality. A marking of four is given for a horse having

perfect quality. This means that the bone must be clean, fine, yet indicating sufficient substance, tendons lean, hair and skin fine. The coarse bone and big, coarse haired horses are not desirable, because it is an indication that the quality of the bone is not the best. The next heading is temperament; neither should a horse be a lazy temperament, but he should be energetic. He should have a good disposition, not vicious. He should be a willing worker, as there is no pleasure in being dragged round the field by the lines or carrying a whip to urge a horse. Four points are given for temperament. The head and neck of the draft horse are of very little value. Under the heading of head and neck we have the muzzle, eyes, forehead, ears and neck. These points only count one apiece on the score board.

This brings us back to the shoulder. Sometimes people will breed to a stallion because he has a good head, a high prominent crest, but never think of looking at his feet and legs. The shoulders should be sloping, smooth, snug and extending in at the back. A shoulder that is too straight does not furnish the necessary reach to the front leg and there is great danger of a horse becoming knee-sprung early in life with too straight a shoulder.

The arm, the forearm, the knees, the cannons, the fetlocks and the pasterns are comparatively minor points until we reach the feet and legs. Here twelve points are given for the front feet and legs. The feet should be large, even sized, straight, dense, dark color; sole concave, bars strong, frog large, heel wide and high and one-half length of toe. The legs viewed in front, a perpendicular line drawn from the point of the shoulder should fall upon the center of the knee, cannon, pastern and foot. If this line does not fall upon the center of these different places there is something wrong with the front leg of your horse. From a side view a perpendicular line dropped from the center of the elbow joint should fall upon the center of the knee and pastern and down back of the hoof. Unless this line falls back of the hoof, there is something wrong with the set of horse's leg. Now, in breeding to a stallion I think any of you after having practiced dropping a line with a light from these two points should be able to tell from the horse's front legs whether or not the horse's legs and feet are properly under him. You do not want too short a pastern, nor neither do you want too long a pastern. With two short a pastern there is danger of the horse becoming knee-sprung, getting side-bones, ring-bones, etc.

With too long a pastern you have a weakness. You have a weakness which is hard to correct by breeding. With the long pastern horses walk too much on their heels. A horse should step squarely on his foot. The foot should touch the ground evenly.

Under the heading of body, consisting of chest, ribs, back, loin and underloin, but nine points are given, one more than for the front feet. In the hind quarters the hips, croup, tail, thighs, quarter and lower thighs count but eleven points, while the hocks count eight points. The hock is the weak place in the hind leg. Blemishes come about the hock. The hock should be clean-cut, wide and straight. The skin over the hock joint should fit as snugly as a new kid glove fits your hand. The hock should be free from meatiness. Five points are given for the cannons, fetlocks and pasterns in the hind legs, while ten points are given for the hind feet and legs. The description already given for the front feet will apply to the hind foot, while the legs viewed from behind, if you drop a line from the point of the buttock it should fall in the center of the hock, cannon, pastern and foot. And from a side view a perpendicular line drawn from the center of the hip joint it should fall in the center of the foot and divide the gaskin in the middle. A

perpendicular line drawn from the point of the buttock should run parallel with the line of the cannon.

A draft horse should be a good walker. He should walk straight, his walk should be balanced. He should pick up his feet quick and set them down quick. For this six points are given. The trot should be straight and rapid. For this four points are given. It must be remembered that the power of the draft horse is in the hind quarters. Too many of our draft stallions are too long-coupled. When breeding from a stallion of any malformation you must expect to get the same defects in his colts. They might not be born with the defect, but the condition that will bring about the defect is born in them.

Too many people look to the big points and do not consider the small ones. If people will take proper care of the breeding of their horses a good many blemishes will be avoided. Some people do not go to the expense of taking the shoes off in time, but allow the toes to grow long, which causes a strain on the mechanism of the foot and leg. The result is that some blemishes appear. I would prefer to breed to a stallion weighing 1800 pounds that was properly put together than to one that weighed 2200 pounds that was not properly formed.

TEN HOG RULES

FIRST—Select thrifty, vigorous, well-bred breeding stock.

Second—Do not feed the brood sow too much corn. The following rations will give good results: Ration No. 1, corn nine-tenths, meal one-tenth; No. 2, corn nine-tenths, tankage one-tenth; No. 3, corn two-fifths, oats three-fifths; No. 4, corn one-half, bran one-half; No. 5, corn one-half, shorts one-half; No. 6, corn one-half, bright clover hay one-half; No. 7, corn one-half, bright alfalfa hay one-half. Clover and alfalfa hay are especially good, because they are cheap, bulky, laxative, muscle-producing rations.

Third—Brood sows should have exercise. Fat, lazy sows will not give good results. They should be fed light enough so that their appetites are keen, and then if allowed to follow milk cows or stock cattle this will keep them strong and vigorous.

Fourth—Provide good shelter at farrowing time. The hog house should be dry, well-lighted and free from draughts. One pig, or at most two pigs, will pay for a nice little house for each sow, and yet hundreds of thousands of farmers raise an average of three pigs per sow each year instead of six pigs per sow, all because they do not provide shelter.

Fifth—Do not overfeed the sow at far-

rowing time. Water is all a sow needs the first day after farrowing. The second day she can have a light feed and the third day a little more, the rate of increase depending on the size of the litter and the milk producing ability of the sow.

Sixth—Keep the pigs growing. The cheapest gains are made when the pig is young. As soon as the pigs are old enough they should have a "side table" of their own, where they can be fed away from the other hogs.

Seventh—Provide green pasture from early spring till late in the fall. The cheapest gains are made on pasture. An acre of good clover, rape or alfalfa pasture will make 400 to 800 pounds of pork, worth at present prices from \$30 to \$60 per acre.

Eighth—Provide pure, clear drinking water at all times. Do not allow pigs to drink out of mud holes.

Ninth—Keep the herd healthy. To get rid of lice, dip in a coal tar or crude oil dip twice in the spring and twice in the fall. To prevent worms, make charcoal out of corn cobs and other trash, mix in some salt and let the pigs eat it. To prevent cholera, vaccinate the hogs with good vaccine. Keep the buildings and lots disinfected and clean.

Tenth—You must love your pigs and strive to take a little better care of them tomorrow than you did to-day. The last rule is the golden rule of the hog business.

EQUIPMENT OF HOG FARM

BY GEORGE T. WHITE.
Dallas Center, Iowa.

A HOG farm properly equipped must have a fair-sized central hog house. I spent considerable time in studying out the plans of my hog house two years ago. This house is twenty-three feet wide and fifty feet long, faces the south, pens seven by eight, and alley seven feet wide. The partitions are all on hinges so they will swing around cross ways and the cross pieces all on hinges so you can turn it from a dozen small pens into two large ones. There is only one door which opens out into the orchard and pasture beyond. I have two good-sized windows for each pen in the south side and in the upper part two full windows. No matter when the sun shines my hogs will get it. The floor is cement throughout and level, but if I were to build again I would build the alley floor level and the pens with about two or three inches slope. Then in the summertime you could have a small pump and could wash it perfectly clean and I believe it would be a good idea. I have a tank on the ground and a large pump, and it is easy to get what water I need. The house is connected at one end with the barn and I have a chute where I can pitch my bedding from the barn into the alley of the hog house. At the south I have a crib and two bins and between the two bins and the corn crib I have a sheller and a grinder and a four-horse-power gasoline engine. I can shovel my corn into the sheller from the crib door and run it into either one of the bins and from the bin into the grinder and back into the other bin and the meal and the water are only four or five feet apart.

But you can't get along with just one hog house, no matter how large it is. A man should have some individual hog houses and perhaps some permanent smaller ones in other yards or pastures, because you have to divide your sows up, putting three or four together, and you can move the individual hog houses into the different pastures or yards. I don't use the individual hog houses for farrowing any more, because it is too much work. It is easier to take care of them in the hog house without going out into the weather, which means a good deal along in February or March.

THE MARKET AND THE HOG

GROWTH is flesh. Fat is finish. Breed and feed for growth, shorten the fattening period, then we would be able to show a profit on the last 100 pounds of weight added to the carcass, equal to or in excess of the former 100 pounds, and when the packer dresses out the animal he will have a greater percentage of lard. Lard is bound to be cheap, as petroleum to-day is the standard of our lubricants. The great cry for early maturity has been overdone or has misled us. It has developed for us to-day a piece of lard instead of a piece of palatable meat. This is the early maturity of fat or finish. On the other hand, I do not believe that we can overdo the early maturity of growth or flesh. This means the strengthening of every organ in the animal, keeping the absorbing capacity of the bowels and stomach at its best, thus improving by getting more strength out of the feed consumed, for when fat contracts the intestines it lessens the power of the animal to get out of its feed all that it should get out of it. This means waste. The length of the bowels of a hog is forty-nine feet. It is just as long in a sucking pig as in a matured hog, so it stands us in hand to develop the size of the organ, making it bigger around, enabling the animal to have greater power to digest the food that it eats.

We should take more lessons from the dressed carcass; this would give us a better understanding than to take all our lessons from the outside. The outside should only be an index as to the cutting value of the animal and if the inside is properly provided for the outside will take care of itself. The idea of carrying a pig from birth in full at form until it reaches the block or breeding pen is not only ruinous to the breeding qualities, but has caused our experiment stations to show an extra cost to the last 100 pounds of weight. This should be the cheapest. Excessive fat at an early age is one of the greatest causes of a lack of vitality in our swine. Six weeks is long enough to feed a hog to finish for the market. Carry piglets along with his flesh so that two weeks will bring him to full feed and four weeks of full feed will finish him. Then put him on the market at any age to suit the feeder.

CHICKEN NOTES

YOU can keep a good hen just as cheaply as you can a poor one.

Milk is a great egg food. A poultry and dairy farm is combined profit.

When hens stop laying, they may often be started again by change of feed.

Have plenty of grit—the sharper the better—available for the poultry.

Never allow incubator chicks to become chilled. One-half the ill of young chicks arise from this cause.

It hardly ever pays to doctor a sick chicken, but it does pay to use the most improved methods to prevent disease.

When hens lay soft-shelled eggs it is a sign they are too fat. Cut down the amount of grain and feed more vegetables and green food.

Lazy hens, like lazy men, are not money makers, but eat up the labor and profits of the busy ones. You can kill the hens, if not the men.

It does not pay to put two kinds of eggs in a machine at the same time. Hatch the ducks' eggs at one time and the hens' eggs at another.

One cannot raise chickens and lice together. The lice will thrive at the expense of the chickens. There is no profit in lice.

Be a friend to your poultry; give them to understand that they may expect only kindness from you and they will return that kindness tenfold in salable eggs and meat.

THE FARMER NEEDS CO-OPERATION

THE farmer, because of his less close touch with his neighbor, has been slow to appreciate the power and value of this organized co-operative effort. But this attitude is changing and its value is recognized as never before. Given the willingness to co-operate, the dairy business offers exceptional opportunities for successful effort. The co-operative creamery has been attempted in many communities. In some it has succeeded, in others it has failed because of conditions which must be overcome before community effort will maintain the purpose of the majority and loyally support the leader who is chosen to execute the will of the organization. Second, the selection of a leader who has shown himself competent to "make good" in any work undertaken, whether it is his own or other people's. The lack of one or the other of these two essentials has brought many co-operative enterprises to ruin and has seen individual ownership step in and succeed where community effort failed.

It is a question whether the consideration named second should not be placed first. Why should a man who cannot manage his own business be elected creamery manager, because the poor fellow needs a job, if the creamery is established for the purpose of making money for its owners? On the other hand, no matter if some individual is so constituted as to be unwelcome in some homes, if his record is one of honorable transactions, with the ability to do thoroughly and to make money for himself or the firm he works for, the probabilities are infinitely greater that, given loyal support, he will succeed as a leader of a co-operative enterprise. No enterprise can succeed commercially without a leader who is willing to take the leadership and exercise its privileges and meet its perplexities.

Co-operative marketing of fruits with impartial grading and a large volume conforming to fixed standards, has been the salvation of the apple business, the lemon, the grape—in fact, all the fruit business of the Pacific coast—and the same fundamental principle is back of the fact that creamery butter as a class commands a higher price in the market than dairy butter. Additional dairy lines which are adapted to co-operative efforts are the Cow Testing association and the Co-Operative Breeding association. The first is essentially the employment of a man who gives his whole time to the doing of a business producing more while he who is the successful salesman shall have more to sell and get more for that which is for sale, and which can be marketed from a common center?

STACKING THE GRAIN

BY AN OLD AGRICULTURIST.

STACKING grain was always a work I liked to do. In my youth we had a man named Cranson working for us who was one of the most successful small grain stackers I ever met.

Having a good-sized farm, our own thrasher and several teams, we tried to thrash from the shock as much as possible, but the weather, the extra help and teams needed often caused us to spend time in making stack sittings in the field and at the barn.

A wet stack, with its sprouted grain, was something to be avoided if possible. This being so important, all of us young folks were glad to work with friend Cranson. He was not only a good workman, but a fast one. Fast work and good work seldom go together. He insisted on round stacks at the barn. Elongated stacks, or ricks, would be built in the field if ordered—not otherwise, as he thought them unsafe if left through the sweating period.

What is the secret of making small grain stacks so they will not be wet inside? A good foundation, keeping the middle full and tramped, and a loose edge. Mr. Cranson's stacks were always of perfect shape. The outer bundles on one side was the same distance from the center as any other outer bundle. The diameter of the base would be less than the diameter of the same stack five or six feet from the ground. We youngsters were taught to do this by laying the bundle so the slant of the butt caused by the shock position would gradually build out from the ground to the bulge and then gradually be drawn in by laying the bundle the other side up.

At the barn, after shoveling the loose soil away, we laid poles, old rails, etc., to form a foundation. In the field nothing was provided except to get a level place. In providing a level place the dirt was not used or moved from one side and piled up on the other. Such foundations were forbidden. Solid dirt. No loose soil to settle and tip the stack. Just a little tip might run the water into the stack.

To commence, the first bundles were shocked. These were circled by other bundles in continuous circles, each just so far from the center of the foundation, until the desired diameter was reached. The center was the next object or aim. The man shingling the roof always puts a double course at the eave. So we would double our first outer tier of bundles. When that circle was completed with each bundle laid so the butt slant would throw its upper side out a little, we would commence a second tier with the butts laid over the bands of the outer tier, but turned over so the butt slant would pitch the other way. Of course, no bundle, step or weight of any kind was allowed to fall on these two tiers. When the second row was finished a third row would be commenced, with its bundle laid so the butt would pass the end of the second tier, and the distance between the band and the butt of the lower bundle, butt slant still running back. This tier was packed more tightly

FORCING MOULTING

BY F. L. SNYDER.

IT IS a good plan to get the hens moulted in good feather before cold weather comes on, so about the middle of July feed down the feed for about two weeks, simply feed green stuff with a very little grain. This will bring them down in flesh and will stop egg production entirely. After two weeks increase the feed gradually until you are giving a full feed, then feed them generous, not forgetting to supply some meat food. This will cause them to throw the old feathers and bring out new, which will take about sixty days after this they will commence laying again and with proper care will keep it up all winter.

AMOUNT OF SILAGE

THE amount of silage to be fed to live stock, according to the best tests made by different experiment stations, are about as follows, dairy cows a daily average of 30 pounds, beef cattle 15 pounds, wintering calves 20 pounds, dry cows 40 pounds and sheep 2 to 5 pounds. A silo 16 feet in diameter and 30 feet high will hold 120 tons of silage.

SHALLOW CULTIVATION

BY C. B. HUTCHINSON,
Secretary of Missouri Corn Growers' Association.

IF THE season is dry about the time the corn is ordinarily laid by it will pay well to go through it two or three times with a one-horse shallow working garden cultivator or a small harrow, keeping a loose layer on the surface up until earing time. Care should be taken to cultivate very shallow at these late cultivations—not over two inches deep—so as not to disturb the roots. An old mower wheel or corn planter wheel weighted down makes an effective tool for dragging through the corn in this way. The late cultivation keeps a mulch on the ground and kills the weeds which come on after ordinary cultivation ceases. At no time during the growth of the corn is the abundance of moisture in the soil more necessary than during the period between tasseling and maturing and two or three cultivations at this time may make a difference of from five to fifteen bushels of corn per acre. A rain at this time may often be harmful by making more water to evaporate than is gained unless the crust which it forms on the soil is broken up and a mulch made again.

CLOVER DEEPENS SOIL

BY W. P. BROOKS,
Director Massachusetts Agricultural Experiment Station.

THE production of clovers under the right conditions enriches the soil. This is true even when the crops produced are cut and removed. Clover, as has been pointed out, is capable of taking its nitrogen from the air. Not only does it take from the air under the right conditions a large proportion of the nitrogen which becomes a part of its stems, leaves and flowers, but it takes also large amounts of nitrogen which becomes a part of its root. The three tons of clover hay which an acre of good clover land will produce in a year will contain about 120 pounds of nitrogen; and yet after the production of this crop the soil will contain more nitrogen than it did at the start. If conditions have been right for the roots and the stubble of the clover are very rich in this element, and when these decay, the nitrogen they contain becomes a part of the capital of the soil and this nitrogen has been taken from the air and thus brought within the reach of subsequent crops through the agency of the growing clover.

In one other direction the growth of clovers is likely to result in soil improvement. Most of them are very deep-rooted plants. They have long, thick tap roots, which run down into the soil. As a consequence, the sub-soil compound is opened up and mellowed. The availability of the stores of plant food in it, as well as in the surface soil, is increased. Crops which follow clovers are likely to send their roots deeper into the soil than when following grasses which are more shallow rooted. Under these conditions crops are less likely to suffer.

CHERRY TREE 150 YEARS OLD

A CHERRY tree, said to have been the largest in New Jersey, has been cut down at Koandah Farms, on the Oxmead road, near Burlington, N. J. The tree has stood for more than 150 years, and many generations have enjoyed its fruit. It was of the luscious, old-fashioned variety known as "Grayheart" and has been a township landmark. Some idea of the age and size of the tree is gained from the fact that the trunk, just below the first branches, measured 14 feet 5 inches in circumference. Some of the grooves in the rugged bark were 9 inches deep. While some of the upper branches were decayed, making them a menace, the giant trunk is solid to the center. It has been left standing and will support the floor of an elevated summer house. Two of the largest limbs were 18 inches in diameter.

The land on which the tree grew has been in one family's possession since it was purchased from the Indians. It is now owned by John G. Sholl, a florist. Tradition says the tree was planted by Anna Antrim, daughter of John Antrim, son of one of the original pioneers. John Antrim at the time was 94 years old, but his daughter predicted he should live to pick and eat fruit from the tree, and this prophecy was fulfilled, as the old man died at the age of 104 years.

FEEDING THE HORSE

THE total quantity of feed required in the twenty-four hours varies widely with individual horses and their surrounding conditions. The division of the total quantity of feed into such three parts that will be easiest to digest, allow the greatest comfort while at work, and not diminish strength, will be found best and most economical. Many horsemen feed the same quantity of hay and grain morning, noon and evening. Others divide the grain feed into three equal parts and feed all the hay in the evening with every satisfactory results. There are still others who prefer to feed one-fourth of the total quantity of grain in the morning, one-fourth at noon, and the remaining part in the evening. These same horsemen also feed but a very small quantity of hay in the morning and at noon, and a much more generous quantity in the evening. Either of the last two methods is to be recommended. Most of the hay should be fed in the evening for best results, because at that time its excessive bulk will not interfere with free body movements.

SADDLER'S HEAD AND NECK

NOWHERE a good head and neck a greater premium than in the saddle. The head should be fine and shapely, with good eye and nostril, and an expression of quiet eagerness is highly prized. The neck should be light, but well arched, well set out below, and with the length of neck and set of head to insure a good mouth. Strong, sloping shoulders, which display flexibility proportionate with that of the knee, are important, as is a high wither. Shortness and strength of back, and strength of loin and stifle, with a good depth of chest, tell the story of the weight-carrying capacity of the horse. Good muscular development and all-around attractiveness are worth money every time.

AMERICA'S GREATEST FARM DAILY

Chicago Daily Farmers and Breeders Journal

HAS made a tremendous success throughout the country, because of the accuracy of its market reports, the reliability of its news, the cleverness of its features and the attractive make-up of its contents. Established forty years, it is showing the advertisers the absolute value of such a newspaper, built upon clean, legitimate principles, by bringing results to them through its splendid constituency of agricultural readers.

Daddy's Bedtime Story

To Prove a Fib Is Not a Fib Is Hard For Daddy

DOES it always pay to be polite, daddy?" asked Jack one evening when the frogs began croaking "Goterbed, goterbed!"

"Surely," answered daddy. "If it wasn't for politeness everybody would go around the world squawking like an old wagon wheel with no axle grease on it. Why do you ask, Jack?"

"Oh," replied the little boy, "it all seems like such an awful lot of fuss to me! And if you'll excuse me, daddy, it seems to me as if it meant the telling of a whole lot of fibs."

"Oh, dear," sighed daddy; "now you've come to a question that has puzzled many older and wiser heads than yours or mine. Personally I believe that a lie if spoken with kindly intent is not a lie at all, but hundreds of thousands of good folks would say that I was wicked to even hint at such a thing."

"Still, as I said before, my dears, that is one of the questions every one must sooner or later decide for herself or himself, and, besides, this seems to be more of a lecture than a story, so I'll have to tell you about a dear old lady who lived in our town who got the best of her neighbor, a crusty old church deacon, by deliberately but politely fibbing."

"His chickens would keep going in her yard and spoiling her nice flowers, and every time she protested she would be met only with growls and told to keep her fences mended. So one day she wrote a lot of cards and tied each of them with a long thread to a kernel of corn. They read something like this:

"Dear Mr. Deacon—Please send your chickens over every day. They are such good company."

"Dear Mr. Deacon—Your chickens have overlooked my new tulip bulbs. I'm afraid I planted them too deep for the dear little things. I shall have the bulbs spaded up today."

"Dear Mr. Deacon—How much war shall I give your chickens for luncheon? My seeds must be very dry eating."

"Now, the deacon was a deacon, and each card told a deliberate story, but he went over to the old lady's house that afternoon and apologized, with the first laugh anybody had seen on his face for years."

"Doesn't politeness pay?" asked daddy.

"Clever politeness does," answered Evelyn.

"They were fibs just the same," insisted Jack.

"Oh, my poor head!" said daddy.

IN PARAGRAPHS

MASONIC CALENDAR.

Acme Lodge.
Acme Lodge, F. and A. M., Thursday evening, Sept. 14. M. M. degree. Newark Lodge.

Newark Lodge.
Newark Lodge, No. 97, F. and A. M. Special, Friday, Aug. 18. E. A. and F. C.

Bigelow Council.
There will be a regular meeting of Bigelow Council, R. and S. M., Wednesday evening, Sept. 6, at 7:30 o'clock.

Warren Chapter, No. 6, R. A. M.
Stated convocation, Monday, Sept. 4, 7:30 p.m. Regular business.

Loyal Order of Moose Calendar.
Meets every Thursday evening. House Committee every Tuesday evening. Special for next Thursday, corn roast.

Erman's Original Cut Rate Drug Stores save you money. Arcade, 405 W. Main, 361 East Main. 7-21-11

Erman's Cut Rate Drug Stores give you the best for the least money. See our windows today. 7-21-11

Mrs. Coffman's Statement.
Mrs. Reuben Coffman, whose case was heard before Mayor Ankele on Tuesday, states that the evidence in the case showed that the ax which struck her husband was not in her hands at the time. She states that she did not demolish the door, but that it was opened after the first blow was struck. She claims that she was after her own property at

BLACK HAND REUNION OF OLD SOLDIERS

For more than a quarter of a century the old soldiers of the civil war and the old sailors also, of Licking and Muskingum counties have been holding annual reunions at the romantic and beautiful Black Hand, a few miles east of Newark, and while the yhave always been a great success, the one held Thursday, August 17, is said to be the greatest success of them all. While not as many of the old comrades come together of late years. It is made an occasion when a large part of the population of both Muskingum and Licking counties come together to do honor to the old boys who wore the blue. The farmers of the entire eastern part of Licking county and western Muskingum gather in large numbers with baskets well filled with edibles of all kinds, and the occasion never fails to be honored with a large delegation from Newark. It is thought that over 1000 people from Newark alone attended the reunion on Thursday.

No pains had been spared by the management to make the occasion a pleasant one for all attending and they had good reason to congratulate themselves on the success of their efforts.

Splendid music for the occasion was furnished by the Brownsville Band, which is one of the best musical organizations in the county, and the old soldiers were forcibly reminded of the old times during the civil war when the beat of the drum was heard on every side.

One of the features of the big day was the splendid dinner served at the noon hour, which was greatly enjoyed by all.

Among those on the program for addresses were Col. W. A. Taylor, Commissioner of Soldiers' Claims, Gen. H. A. Axline, Hon. H. M. Daugherty of Columbus; General R. B. Brown, Attorney Howard Buker of Zanesville; Rev. L. C. Sparks, Attorney B. F. McDonald, Charles L. H. Long, M. R. Scott, Newark; Rev. J. L. Wylie, Granville, and others.

Wickham's grove has become a sort of mecca to the old soldier and thither we may expect to see them make their annual pilgrimage from year to year as long as any of them survive.

Quarter Century Ago.

(From Advocate, Aug. 17, 1886.)

The funeral of Julia, the daughter of Mr. and Mrs. G. W. Owens, took place today.

Dr. Charlie Stimson is enlarging his office by building an addition in the rear.

Mr. H. J. Jessop, an employe at the B. & O. machine shops, had his fingers mashed by a heavy piece of casting falling on them.

Fifty Years Ago Today.

Aug. 17.

Reported that Confederate forces were being moved to the line of the Potomac, the north believing purpose was to encourage southern sympathizers in Maryland, with ultimate designs on Washington.

Twenty-five Years Ago Today.

Crowd killed assassin who attempted to murder the president of Uruguay as latter was entering a theater in Montevideo.

Earthquake shook Malta island, Mediterranean possession of Great Britain.

Simple Remedy from W. A. Erman & Son Removed Them.

"The best skin specialists told me that nothing would remove my freckles and that I would carry them to my grave," said a well known society woman, "but I fooled them all with a new drug, ointment—double strength, that I bought at W. A. Erman & Son's, which cleared my skin and gave me a fine complexion."

The action of ointment is really remarkable, for when applied at night many of the freckles disappear entirely by morning and the rest have begun to fade. An ounce is usually all that is needed, even for the worst case.

Be sure to ask W. A. Erman & Son for the double strength ointment, as this is sold under guarantee of money back if it fails to remove the freckles.

Meeting Postponed.

The meeting of the Colonial Circle will be postponed from Friday, Aug. 18, until Friday, Aug. 25.

National Horsehoes' Holiday.

Saturday, Aug. 19, all horsehoes-ing shops will be closed. 17-21-11

National Horsehoes' Holiday.

Saturday, Aug. 19, all horsehoes-ing shops will be closed. 17-21-11

OBITUARY

VIOLA LAUGHERY.

Viola Grady, the 10-months-old daughter of Mr. and Mrs. E. H. Laughery, died at the home of the parents on Manning street, Wednesday afternoon about 4 o'clock, after a short illness. The body of the little one will be taken to Fredonia and short services held there Friday. Interment in the Fredonia cemetery.

JOHN A. LONG.

The funeral of J. A. Long, who died at the City Hospital Wednesday morning, will be held Friday afternoon, the services being conducted at the home, 343 South German street, at 2:30 o'clock, by the Rev. Mr. Ver-non. Interment in Cedar Hill cemetery.

W. W. WALKER.

The body of William W. Walker, who died at his home in Cherry street, in the Tallmadge Addition, in the North End, Wednesday morning, was taken to Cumberland, Guernsey county, Thursday on the noon train, and funeral services will be held there Friday morning at 10 o'clock.

NOT RALPH SHEA.

A message from East Liverpool, O., a few days ago announced the death of a brother of M. Shea, who managed the Auditorium here last winter, and at the same time the report was circulated that the brother was Ralph, the young man who assisted Mr. Shea in the box office of the theatre. A letter from M. Shea received by a Newark friend Thursday, said it was not Ralph Shea who had died, but that it was M. Shea's elder brother, John.

LA FOLLETTE IS LARGER FIGURE

Wisconsin Senator Holds Key to Legislation.

CONFERS WITH BOTH SIDES.

Man Who Was Once Butt of Ridicule Is Now Doing Work Formerly Performed by Aldrich, Hale and Other Leaders—Little Japanese Naval Officer Shows Knowledge of Geography.

By ARTHUR W. DUNN.
Washington, Aug. 17.—[Special.]—Most remarkable of all sights during the past week was to see Senator La Follette going about the senate conferring with different senators on both sides of the chamber. La Follette, who only a short time ago was the butt of ridicule in the cloakrooms and of censure on the floor, was doing the work formerly performed by Aldrich, Hale and other leaders.

First he was in close converse with Martin, the Democratic leader, then with men on the Republican side who have scarcely been on speaking terms with him for six years. It was an acknowledgment that La Follette, once so unpopular, held the key to the legislative situation.

As if to emphasize the advancement of the Wisconsin senator, he now takes the seat so long occupied by Senator Frye, the most prominent place on the Republican side.

The Jap-Knew
At the White House dinner given by President Taft in honor of Admiral Togo former Speaker Cannon and Congressman Butler of Pennsylvania were seated next to each other, and next to them was a little Japanese naval captain. The conversation between the two congressmen turned on the Italian situation, which was just at a climax. Both had made voyages in the West Indies.

Finally a question arose between them as to whether Haiti and Santo Domingo were separate islands or just what was the connection. Neither Uncle Joe nor Butler knew as a matter of fact. Both knew that "first one and then another nigger was sent hiking across country as an ex-president," but how the two governments were geographically arranged they did not know.

"Do you suppose this little Jap will know?" asked Uncle Joe.
"You bet he'll know. They know everything," replied Butler.

And so they asked him. And he did know. He knew that there were two governments on one island, the principal ports and towns and the relations of the people to each other, the interests of the United States and the general effect of stable governments of the West Indies had upon the usefulness of the Panama canal. The Jap naval officer knew a mighty sight more than two distinguished members of the American congress about a subject right at our doors.

To Remodel Old Glory.
When New Mexico and Arizona become states the arrangement of the stars to represent forty-eight states will be far from satisfactory unless such scheme as proposed by Congressman Hayes of California is adopted. He would have the forty-eight stars arranged in a circle, the number to symbolize the number of states. Within this circle there should be a five pointed star constructed of smaller stars, in the center of the big star a red circle to symbolize the colonial and insular possessions. The suggestion, with the exception of the inner star and circle, may solve the flag problem.

The "Sucker" State.
The use of the word reminds me that it states could now have an opportunity to revise their nicknames they would gladly do so, or at least many of them would. Illinois would abandon "Sucker" as quickly as possible, and it is presumed that Georgia would not cling to "Cracker" or North Dakota to "Blickertail." In fact, North Dakota is making strong efforts to rid itself of the nickname.

On the other hand, many states are proud of their nicknames. Did you ever notice the buckeyes adorning an Ohio delegation or the sunflowers that bloom about Kansas? Then there is the California bear, the Michigan Wolverine, the Wisconsin Badger and the Minnesota Gopher, with all of which the citizens of those states seem satisfied.

Clapp Watches Golf.
Not so very long ago Senator Clapp bemoaned the fact that the progressive party was in danger of decay because Bourne, Bristow, Cummins, Brown, Dixon and perhaps others seized every pretext to go out and play golf. And now the Minnesota senator has reached a point where he goes out and watches the games. By next fall he will be playing and talking about stymies, lies, holding out, putts, brassies, drives, etc., with the rest of them.

Dixon May Be Chairman.

Senator Dixon of Montana may become chairman of the committee on public lands. Nelson will succeed Frye on commerce, and Smoot and Heyburn are likely to prefer their present assignments on printing and manufactures rather than public lands. Gamble could have the place, but he will remain chairman of Indian affairs.

Mr. and Mrs. George Iden and son, Charles, visited J. D. Priest of Pleasant Valley, Sunday.

Miss Little Martin of Newark is spending this week at her home here.

Miss May Varner has returned to Athens after spending two weeks with her parents, here.

A MEDIEVAL LOVE AFFAIR

By MARGARET L. BLISS

Copyright by American Press Association, 1911.

One morning some three centuries ago, when Florence, Italy, ruled by Duke Cosimo de Medici, was divided among a number of powerful families, the Duchess Eleonora, attended by courtiers, was driven from the Pitti palace across the bridge called the Ponte Vecchio, spanning the river Arno, into the main part of the city. Beside the duchess sat a young girl noted especially for her fair complexion and golden hair. From an upper window overlooking the bridge a young man looked down on the cavalcade. About stood a crowd of persons dividing their glances between the young man and the young girl beside the duchess. His eyes were riveted on her, while she glanced up at him. They were known to be lovers, all Florence sympathized with them, and the crowd had collected to observe this lovers' look that passed between them.

The girl was Maddalena, the daughter of Bernardo Vettori, surnamed "the light haired," and it was from him that his daughter inherited her locks of gold as well as an immense fortune. The mother of Maddalena when widowed married Pietro Salvati and in order to keep her fortune in the family, the stepfather betrothed her when still a child to his son by a former marriage. But this young man was killed in battle.

When Maddalena came to a marriageable age a love affair came about between her and Lodovico Capponi, who owned a villa in the country adjoining one of her own. It was a grand passion on both sides, and the flame was fanned by opposition. Maddalena's stepfather, still bent on keeping his fortune in his own family, persuaded Duke Cosimo to forbid the marriage. Despite her own, her mother's and her lover's protests and entreaties the girl was placed in a convent.

Lodovico was a fiery young man, and it was hoped by the stepfather that he would commit some act of violence which would afford an excuse to banish him, lock him up or otherwise dispose of him. But the lover displayed more self control than had been expected and refused to give his enemy the coveted opportunity.

Maddalena's mother told the story of her daughter's love and misfortunes to the duchess and succeeded in interesting her. The affair was known to all Florentines, who were a poetic and artistic people easily moved by a story of love. Moreover, they feared that if the duke was able to prevent this marriage he would prevent others. Therefore, though all the power to keep the lovers apart was on one side, all the sympathy was on the other.

The duchess finally succeeded in persuading her husband to permit her to invite Maddalena to visit her for a few days at the palace. Instead of days she remained months. But the struggle to compel her to resign her lover was not given up. Indeed, her invitation came in order to unite her with another suitor. By the duke's order Lodovico was never mentioned except in contempt, while Sigismondo di Rossi, a favorite of the duke, was always spoken of with the highest praise.

Lodovico, not being permitted to visit the girl he loved, rented a house overlooking the Ponte Vecchio, from which he could look down upon her and receive her return glance whenever she crossed the bridge with the duchess. It was one of these occasions that has been described at the opening of this story, a scene that would not likely have happened anywhere except in the city of the medieval Italian poets and painters whose names and works are part even of the present age. The bridge that Maddalena crossed stands today, traversed daily by thousands of Florentines and tourists.

Perhaps no incident in the history of Florence can so well express the difference between that age, that people and this. Fancy a crowd at the entrance of a park in an American city, Washington for instance, waiting to see an heiress driven out with the president's wife, her lover standing at the window of a house he has hired for the express purpose of seeing his ladylove go by. That age has passed, but romance still exists and is as deep set in human nature as ever. While the people of that day were interested in individual cases, we now find its expression in "best sellers." Have we not in this respect degenerated?

Whether it was that the duke, who was only interested in Salvati's plans through friendship for him, found that he was playing a losing game for himself, becoming unpopular, or whether he met an undercurrent of opposition from those prominent families who feared his power to interfere in their own affairs, is not recorded, but in any event his opposition suddenly collapsed. One morning at daylight an old woman appeared at Lodovico's bedside and awakened him with some astonishing and delightful news. She bore a message from the duchess, Lodovico was summoned to the palace to take Maddalena away with him and prepare for an immediate marriage.

The lover bounded out of bed and began the preparations at once, going as soon as he was dressed to the palace. All Florence was interested in the wedding, which took place at the house from which the lover had so often looked down on his mistress, but since it was not large enough the piazza on which it stood was inclosed for a ballroom.

THE LOST RESTORED.

"I've lost that pin twice in the last dozen years, and both times it has come back to me as the result of a little four-line Want-Ad that has located the finder," said a lady the other day in exhibiting a beautiful brooch that she prized most highly.

"I never realized how valuable the lost and found section of the want page is until I missed my pin, returning from the theatre one night. My husband, who often advertises for employees in his business, 'phoned a Want and the next morning the pin was restored to me."

"When I lost it the second time I thought surely it was gone for good, but again a little Want Ad has returned it to me, and oh! how grateful I am."

Such occurrences are frequent as a result of want ads in the lost and found section. How else could so many people be told of the losing or finding of an article of value as through the want?

The wants each day contain many messages of heart interest that convey to those most interested the very information that they are most desirous of receiving.

ENTIRELY BALD

Her Hair Commenced to Grow After Two Weeks' Use of Newbro's Herpicide.

"Fever caused me to be entirely bald. I had given up all hope of again having hair when I was advised to use Herpicide. After two weeks my hair commenced to grow. I now have the most beautiful head of hair anyone ever saw. Praise to Newbro's Herpicide."

Thus writes Mrs. Howard Bailey, of Bellevue, Mich. We can point to thousands of instances where the proper use of Herpicide has been followed by a remarkable growth of hair.

Newbro's Herpicide is the original remedy which kills the dandruff germ and stops falling hair.

One Dollar Size Bottles are sold and guaranteed by all druggists. Send 10c in postage for sample and booklet to The Herpicide Co., Dept. R. Detroit, Mich.

Applications may be obtained at the best barbers and hair dressers.

W. A. Erman & Son, special agents.

UNION STATION

Union Center will be glad to come into notice again after such a season of obscurity through the columns of The Advocate.

Improvements are going on rapidly in this vicinity. The Isabel farm is fine to look at and the Isabel family has taken up its permanent residence here. They will send their sons to Denison University.

Improvements are going on rapidly upon Charley Wintermute's place—a new barn and silo adds to its appearance. The esteemed mother of Marion Hitt passed away last week at the advanced age of 90.

There was a great stir among the seven children of Albert Day last week when the stork left the eighth—a bouncing boy. The stork went across lots to Mrs. Cramer, and left a girl to match, adding to a large family another precious gift.

Louis Wintermute has returned home after a three weeks' visit with relatives in Newark.

The infant child of Elmer Williams is well again after an illness so serious that for some time its life was despaired of. Dr. Laycock of Alexandria was the physician.

Charley Wintermute and family spent Sunday in Newark with George Bourne of Grant street.

PERILS OF MARRIAGE.

Young married people have many obstacles to overcome before they reach the smooth pathway which experience will provide. The young housewife finds her most difficult problem in keeping things "ship-shape" for "hubby" returning from his day's endeavors.

Hewitt's Easy Task soap, pure and white, lessens her labors one-half and gives the sparkle and glow to the china, glassware and silver which gives an impetus to the appetite of a man who has forgotten this most important matter in his every-day toil. Try it at five cents a cake. Just as cheap as "cheap" soap.

SOUTHWARD SUMMER TRAVEL.

One of the curiosities of the year's ocean records is the unprecedented increase in the volume of travel to the West Indies. Tourists have discovered that cooler weather lies to the southward, paradoxical as this may seem. During the hot wave of the past month, N. R. Snyder, the United States consul at Kingston, Jamaica, came to New York to enjoy a change of climate. The temperature of New York did not prove comfortable, so he kept on to North Bay, Ontario. The hot weather still continued, so the consul next traveled to the Porcupine district, 450 miles north of Toronto. Here he found the temperature 101 degrees in the shade. Mr. Snyder immediately turned southward and did not stop until he reached Kingston. The mountain islands of the Caribbean Sea, especially Jamaica, at this season enjoy the invigorating climate of our October at home. The approaching completion of the Panama Canal also serves to swell the passenger list of south-bound steamers. The steamship Prinz Joachim of the Hamburg-American line sailed this week with every stateroom occupied. "The American Mediterranean" is coming into its own.

BEN BREAKS OUT IN REAL POETRY.

Ben Hoover, formerly of The Advocate editorial staff, now with the Canton News-Democrat, is contributing poetry each week for his paper. One of his latest efforts is given herewith:

A GOOD OLD WORLD

She's a gray old world, at best, lad,
She's queer and full of pranks,
She puts us to the test, lad,
With all her foils and cranks.
But right down on the level,
You'll have to doff your hat
For honest, she's a devil—
Of a good old world at that.

She may have black and blue spots
That put things on the hum,
But by ye spades and jack pots,
She sure is going some.
And when it comes to showing
That we can't stick to her long
Hang with her in the goings
And have a laugh and song.

She may have lots of grouches,
Lots of sore-heads, lots of muts,
She may cause yells and "ouches,"
Lots of bumps and ugly ruts.
But she's not all bad, surely,
Lots of lean with all the fat,
She's mixed up pretty purely
And a good old world at that.

BEN HOOVER.

APROPPOS ELECTION.

Indications now are shapin'
In a hazy sort of way
That there'll be some lively doin's
Round about election day—
Track's full

Talk about y'r office-seekers
An' y'r politician guys
There's a wealth o' wily peckers
Seekin' stardom in the skys—
At election

They're just rushin' for petitions
An' a-shakin' with their friends
Linin' up in their positions
Playin' hard to win their ends—
When it comes

Ev'ry feller in th' county
Whose ambition ever scored
Is dependin' on th' bounty
Of the voters' noble herd—
Jest t' git there

We've been wonderin' an' thinkin'
If when we've cast our votes,
Will the winners be a winkin'
At th' way they've crammed our
throats—
with mush?

Or will they still keep shakin'
Tellin' us how nice we are,
Like in days when they were quakin'
Th'ave us make our star
Next their names?

Ever notice 'round election
How they love us all, an' hope
To prevent our stern rejection
By a spread of good soft soap—
Just to win us?

But of course, there's no use sayin'
That such things would happen here—
An' for sure there's no one payin'
Public office is too dear—
To be profitable!

Anyhow, let's take th' jolly
An' consider what it's worth
For th' game's the same old folly
In all corners o' th' earth—
An' they git there!

—BEN HOOVER.

Attack Like Tigers.

In fighting to keep the blood pure the white corpuscles attack disease germs like tigers. But often germs multiply so fast the little fighters are overcome. Then see pimples, boils, eczema, salt rheum and sores multiply and strength and appetite fail. This condition demands Electric Bitters to regulate stomach, liver and kidneys and to expel poisons from the blood. "They are the best blood purifier," writes C. T. Budahn of Tracy, Calif. "I have ever found." They make rich, red blood, strong nerves and build up your health. Try them. 50c. at F. D. Hall's.

Naturally the naked truth consists of bare facts.

The fatter a man gets, the more he feels his weight.

A thorn in the hand isn't worth two in the bush.

It isn't absolutely necessary for fast friends to travel at a rapid pace.

ALEXANDRIA.

Mr. Ben Montgomery and family, Mr. Harley Hughes and Miss Edith Stone of Newark, spent from Saturday until Monday with Mr. and Mrs. Stanley Montgomery.

Miss Arle Long returned home on Monday from a pleasant visit with relatives at Thornville.

C. O. Wells, of Edison, was snaging hands with friends in town Monday.

Mr. and Mrs. Austin Stinson, Mrs. Lillie Stinson and daughter, Lois, Lyman Wright and family, Fred Hammond and family attended the Taylor reunion at Central College last Thursday.

Miss Hazel Wells, of Edison, was in town several days this week the guest of F. F. Wyman and family.

Miss Mary Kapp, of Sabina, O., is visiting Miss Sarah Graves since last Friday.

The "We Girls' Club" was entertained at the home of Miss Margaret Cash last Saturday, twelve members being present.

Miss Margaret Vaughn, of Steubenville, who has been visiting at the

MOTHER GRAY'S SWEET POWDERS FOR CHILDREN.

A Certain Relief for Fever, Eruptions, Eczema, Itch, and all Skin Affections. It is a safe and pleasant remedy for all children. It is sold in 25c. and 50c. tins. At all druggists, or by mail, send 25c. for a tin. A. E. OLNEY, Le Roy, N. Y.

Remedies are Needed

Where we perfect, which we are not, medicines would not often be needed. But since our systems have become weakened, impaired and broken down through indiscretions which have gone on from the early ages, through countless generations, remedies are needed to aid Nature in correcting our inherited and otherwise acquired weaknesses. To reach the seat of stomach weakness and consequent digestive troubles, there is nothing so good as Dr. Pierce's Golden Medical Discovery, a glyceric compound, extracted from native medicinal roots—sold for over forty years with great satisfaction to all users. For Weak Stomach, Bileousness, Liver Complaint, Pain in the Stomach after eating, Heartburn, Bad Breath, Belching of food, Chronic Lascivious and other Intestinal Derangements, the "Discovery" is a time-proven and most efficient remedy.

The genuine has on its outside wrapper the Signature

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic, medicine of known composition, not even though the urgent dealer may thereby make a little bigger profit. Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take as candy.

The Griggs Store

PERSONALS

Miss Lillian Larason is the guest of Mrs. Stanley Stotter of Zanesville.

Mrs. Sarah Idleberger of Morrow county is visiting friends in the city.

Misses Louise and Kathryn Butler left last evening for a visit at Columbus.

Mr. and Mrs. Jas. R. Fitzgibbon returned home from Atlantic City this morning.

Miss Lorena Miller of N. Fourth street is the guest of relatives at Mt. Liberty.

Miss Mabel Williams of Pittsburg is the guest of Miss Alda Scott of Hudson avenue.

Mrs. J. B. Irish, William Irish and Miss Ruth McKee are spending the day at Columbus.

Miss Jessie Barracks of Zanesville, is spending a few days with friends at Buckeye Lake.

Miss Mary Franks of Jacksonville, O., is the guest of her aunt, Mrs. Elmer Orr, this week.

Miss Emma Oberfield who has been visiting friends and relatives in Zanesville has returned home.

Mrs. W. B. Wingerter and sons Herman and Jack of West Church street, are visiting in Zanesville.

Dr. D. H. Miller of North Fourth street was called to Alexandria on professional business Wednesday.

Mrs. Maris Embry and daughter Mary are the guests of Marshall Embry and family of Luray this week.

Mrs. Wm. Lamb and daughter, Helen, have returned from Luray, Va., where they have been visiting relatives.

Eld. J. M. Thompson of Tipton, Ind., held services at the Sixth St. Baptist church Monday and Tuesday evenings.

Seth Austin Haight of Pittsburg, is the guest of his grandparents, Mr. and Mrs. Seth W. Haight of West Church street.

Miss Neva Baumgarten of the West Side has returned from a pleasant visit with friends in Cambridge and Coshocton.

Mr. and Mrs. H. A. Fleming of Cedar street, are guests of Mrs. Fleming's brother, Wellington Wintermute of Mt. Liberty.

Misses Mina and Lola Harter of St. Louis are spending several days with their aunt, Mrs. H. S. Ingman of German street.

Mrs. J. H. Mowery and little grandson, Henry, of Hebron, left on Monday for a two weeks' visit with relatives in Putnam county.

Mr. and Mrs. Seth W. Haight of West Church street have returned to the city after spending two weeks at Tanandau Lake, N. Y.

Mrs. John Miller and Mrs. John Ellis of Newark, spent Wednesday with Judge and Mrs. Frank Ashman on Walnut street.—Coshocton Daily Age.

Mr. Morris Kent left last evening for Baltimore, Md., to attend the florists' convention. He will later visit Washington, Philadelphia, and New York.

Harry Lawn, traveling representative for Proctor and Gamble, soap manufacturers of Cincinnati, was in the city Thursday in the interest of his firm.

Misses Charlotte Tudor and Marie Stein of Chillicothe, who have been making a five weeks' visit at Buckeye Lake and in this city, have returned home.

Miss Bessie Blewens of Louisville, Ky., and little Ruby May Melvin of Charleston, W. Va., are the guests of Mr. and Mrs. Wm. Lewis of West Church street.

Miss Irene Howard, Mrs. Ella Harter, Miss Edith Griffith and Master Earl Howard have just returned from a two months' outing at beautiful Summerland Beach.

Mr. and Mrs. D. B. Cook of near Lancaster, who have been visiting relatives in Cleveland for several weeks, passed through the city Wednesday, enroute home.

Mr. and Mrs. M. A. DeFrance and son Walter left this morning for Cincinnati and Indianapolis, Ind., where they will visit friends and relatives for two weeks.

Mr. and Mrs. Thomas Whipple of Portland, Ind., who came to Newark to attend the funeral of Mr. G. W. Irwin, of Hudson avenue, are the guests of Councilman O. D. Irwin and family.

Misses Jeroldeen and Kathryn Rigger, after spending the past two weeks with relatives here, have returned to their home in Columbus, accompanied by Miss Freda Stotter of West Main street.

Misses Ella and Emma Wilkinson of Indianapolis, Ind., and Mr. and Mrs. George Parker of Columbus, returned home this morning after a pleasant visit with Mrs. F. Wall of Buckingham street.

Mrs. Walter Ramey and daughters, Mabel and Agnes, of Manhattan, Kan., and Mrs. Edw. Curtis and daughter Hazel of Coshocton, were the guests of Mr. and Mrs. E. J. Ramey of Mahoning street the past few days.

Fred J. Cannon, circulation manager of the Advocate, has returned

COURT AGAIN EXPLAINS TAX LIMIT LAW

THE WORD "PROPORTIONATELY" INTERPRETED IN NEW ENTRY ON JOURNAL.

Decision Relieves Situation Which Was Created at Toledo, Cincinnati and Other Cities.

The Supreme court has revised its decision in the Toledo case, construing the Smith 1 per cent tax rate law, eliminating from the first ruling what seemed to be an ambiguity regarding how the budget commission should reduce the various levies to keep them within the 1 per cent maximum.

The misunderstanding of the court construction of the law hinged on the use of the word "proportionately" and in its second deliverance the court explained what was meant by that word.

The new ruling is that the budget commission must first reduce within the five mill maximum such an excessive municipal levy before it undertakes to revise and reduce all the levies to bring the total within the 10 mill maximum.

The revised decision clarifies the situation both in Toledo and Cincinnati, where considerable confusion has existed as to how the levy for this year should be computed.

In the following journal entry the court explains its ruling:

"This cause is submitted to the court upon an application for modification of journal entry, and it is appearing to the court that paragraph four of said entry has given rise to some doubts, confusion and disagreement in the construction thereof by taxing officers of the state, said paragraph four is revised and expanded so as to more clearly and more fully set out the finding and judgment of this court in reference to the matter therein contained, as follows, to-wit:

"4. A municipal corporation may levy for municipal purposes, as provided in preceding paragraphs 1, 2 and 3, an aggregate of 5 mills on the taxable property within such corporation in the event that such levy of 5 mills, when added to the levy of state, county township and school purposes, shall not exceed in the aggregate 10 mills on the dollar of the taxable property within such taxing district exclusive of levies for sinking fund and interest purposes necessary to provide for any indebtedness incurred after the passage of said act by a vote of the people, and provided further that such levy of 10 mills on the dollar of taxable property shall not produce for the year 1911 an amount greater than the amount of taxes levied in the year 1910, and whenever such levy exceeds either of said limitations then it is the duty of the budget commission to revise and reduce said levies in manner and form as directed and authorized by Section 5649-3c, general code, as enacted June 2, 1911, having due regard to the proportions of the total amount that each taxing board or taxing officers are authorized to levy, so that such aggregate of all taxes for all purposes in each taxing district shall not exceed 10 mills on the dollar exclusive of sinking fund and interest purposes as aforesaid, and shall not produce for the year 1911 a greater amount of taxes than levied in the year 1910, as provided in paragraph three of this entry.

"But whenever any levy for township, county, school or municipal purposes exceeds the maximum amount that may be levied for such purpose, as provided by Section 5649-3c, general code, then such excessive levy must first be reduced by the budget commission to the maximum amount provided in such section before said budget commission proceeds to revise and reduce all the levies certified for such taxing district to bring the aggregate of all within the limitations above referred to, to-wit: 10 mills on each dollar of taxable property and to an amount not greater than the taxes levied in the year 1910.

"It is therefore ordered and adjudged by the court that the above and foregoing be entered in said journal entry as paragraph four thereof and that the original paragraph four in said original entry be stricken therefrom."

ATTEMPT TO BREAK JAIL FRUSTRATED

DEPUTY SHERIFF RINEHART FINDS BARS SAWED IN THIRD FLOOR CORRIDOR.

Deprives Prisoners of Freedom of Corridor as Result of the Discovery.

What was evidently a carefully planned plot on the part of prisoners confined on the third floor of the Licking county jail was nipped in the bud Wednesday evening by the vigilance of Deputy Sheriff Henry Rinehart.

About a dozen prisoners are confined on this floor, among them being one person charged with rioting, one who is serving days and nine others who have been bound over to the grand jury, including William Huffman, who was bound over to the grand jury on the charge of having burglar tools in his possession.

For several days past Deputy Rinehart has had occasion to believe that something unusual was transpiring among the prisoners and their actions caused him to take action on Wednesday night.

After securely locking all the prisoners in the inside corridor, he began a systematic search and was rewarded by finding one of the large iron pipes or bars of the window at the east end of the corridor, on the south side, nearly sawed in two. The work had evidently been done with a fine steel saw by an expert. It would have required some time to open the road to freedom, but it could have been accomplished sooner or later if the work had not been interfered with.

Mr. Rinehart, upon discovering the plot to escape, at once had all the prisoners thoroughly searched, but nothing was found except a twisted bit of iron and an old case knife. Deputy Rinehart then made a short talk to the men, in which he informed them that their scheme to make a getaway had been discovered. He told them that he was convinced that there were some who were innocent, but knew of the work that had been going on, and that if they would talk the guilty ones would be punished, otherwise all would be given the same treatment. None of the men, however, are manifesting any eagerness to give up the names of the parties who did the work. In the meantime all the men have been locked in their cells, and Deputy Rinehart says they will be given but three hours' freedom of the corridors and during that time they will be under strict surveillance.

Deputy Rinehart then made a short talk to the men, in which he informed them that their scheme to make a getaway had been discovered. He told them that he was convinced that there were some who were innocent, but knew of the work that had been going on, and that if they would talk the guilty ones would be punished, otherwise all would be given the same treatment. None of the men, however, are manifesting any eagerness to give up the names of the parties who did the work. In the meantime all the men have been locked in their cells, and Deputy Rinehart says they will be given but three hours' freedom of the corridors and during that time they will be under strict surveillance.

Mr. Rinehart, upon discovering the plot to escape, at once had all the prisoners thoroughly searched, but nothing was found except a twisted bit of iron and an old case knife. Deputy Rinehart then made a short talk to the men, in which he informed them that their scheme to make a getaway had been discovered. He told them that he was convinced that there were some who were innocent, but knew of the work that had been going on, and that if they would talk the guilty ones would be punished, otherwise all would be given the same treatment.
